2 Introduction

2.1 Tested system

The system described in this document is the software for a public bicycle garage. This software is responsible for managing the authentication of users and the management of their information and their bicycles.

This document provides a specification for testing the bicycle garage software. The test process consists of the following phases:

- Unit testing
- Integration testing
- System testing
- Acceptance testing

3 Test process

3.1 Process overview

3.2 Unit testing

3.3 Integration testing

3.4 System testing

3.5 Acceptance testing

4 Tested items

5 Test recording procedure

5.1 Unit testing

5.2 Integration testing

5.3 System testing

5.4 Acceptance testing

6 Test cases for system testing

6.1 Test cases

6.2 Requirements coverage and traceability
