Contents		0
1	System requirements	1
2	Getting the software	1
3	Running the software	1

1 System requirements

It is required that the client computer fulfills the following requirements:

- Has the Java Runtime Environment installed.
- Has at least 42 kB—the size of the JAR file—of hardware storage available.

It is recommended that the client computer fulfills the following requirements:

- Has version 1.8 of the Java Runtime Environment installed.
- Has more hardware storage available than previously mentioned.

2 Getting the software

The software can be found in the GitHub repository 1 or in the Google Drive folder 2 . The entire software comes packaged as a Java Archive file (JAR).

3 Running the software

In most cases, the JAR file should be able to be run by simple double clicking on it in a graphical desktop environment. If the user prefers to use a terminal shell, the file may be run with the following command:

java -jar BicycleGaragePro.jar
